

Laboratory of *Drosophila* Research
The Chinese University of Hong Kong
5th Anniversary 2002-2007

I am so proud of being a final year project student working under professor Chan's supervision. In LDR laboratory, besides our wise supervisor, there are nice and great colleagues. They teach and aid me a lot, give me many useful advises and share with me their experiences. These help me going through the hard time of my project. While at the same time, they are friendly fellows that can keep the working atmosphere high.

We always interact in a way that liven the environment, therefore I really enjoy working here.

And I wish the LDR a thriving future.
