

(Adapted from <http://www.figs.ca/comics/Copy%20%5B6%5D%20of%20science%20comics.html>)

Those days were not only memorable to me but they also started my days of learn: how to be a scientist.

← I cannot agree more than that! From the small little vials, I can see the world. Form SARS to Alzheimer disease, I can see all that in a small fruit fly! I worked in Dr. Chan's lab. for the LDR in my year 1 summer vacation as a summer research students. By that time, there is an outbreak of mites (one of the most disgusting drosophila parasite of the world). They ate our flies, like the flies ate our fruits!
