BCH Summer Internship

Learn as you have fun.

Get work experience relevant to your field.

Work on innovative projects.

CUGEN LIMITED

New A Innovation

LEE'S PHARM.

李氏大藥廠

Summer Internship 2013 for the BCH Program is now open!

The Summer Internship is designed for CUHK Biochemistry students to have (1) training opportunities in local biotechnology-related companies, and (2) a firsthand experience at the biotechnology industries in Hong Kong. Occasionally, some positions require students to work outside of Hong Kong.

The training period will last for around 10 to 12 weeks. The projects involved are mainly research-oriented, and are supervised by a technical staff at the post-doctoral level.

**Application Deadline:
March 28, 2013**

The program is open to all BCH Year 1 & Year 2 undergraduate. Interested students please send a copy of your CV to Christina via christinakwok@cuhk.edu.hk respectively on or before **March 28, 2013**.

BCH Summer Internship

This year the Biochemistry Program has the undergraduate student summer internship program with the following four companies:

Company	Potential Candidate
Hai Kang Life Corporation Limited	Year 1 & Year 2 BCH students
CUGen Limited	
New A Innovation Ltd	
Lee's Pharmaceutical Holdings Limited	

Application Deadline: March 28, 2013

COMPANY

Hai Kang Life Corporation Limited
www.HAIKANGLIFE.com

ABOUT US

Hai Kang Life Corporation Limited (HKLife) is a pioneering biotechnology company with global presence serving to advance molecular technology, and development of biotechnology applications and systems into innovative products that significantly enhance clinical diagnostics and monitoring of quality and safety for the veterinary and food markets worldwide.

DESCRIPTION

We accept a limited number of undergraduate students as interns. The internship offers the opportunity to learn about the inner workings of a biotechnology company and obtain hands-on experience.

The development intern will be a part of the HKLife for a minimum of 6-8 weeks. The development intern will gain broad exposure to research and laboratory operations such as conducting experiments and carrying out documentations of relevant records under the supervision of experienced scientists.

This internship provides current undergraduate students with the opportunity to develop laboratory and relevant documentation skills and experience with quality management systems. This position provides the opportunity to work with our experienced scientists.

CRITERIA

The factors will be considered are as follows:

- Career goal and enthusiasm to commit in a biotech career
- Academic achievements
- Whether they are self-starter, diligent, detail-oriented
- Financial Support may be provided

CVs are accepted starting in March 2013. Interviews shall be conducted if overwhelming responses are received. At the end of internship, each student will be asked to submit an internship report.

COMPANY
CuGen Limited

ABOUT US

CuGen (an abbreviation of CU-GENE) is a spin-off company from the Department of Biochemistry, CUHK. It is one of the companies under the CUHK Foundation. The company develops and offers hardware and reagent kits for biology and biotechnology teaching in the local high schools.

DESCRIPTION

Undergraduate students enrolled in this intern will gain experience to research and laboratory operations under the supervision of experienced scientists. We accept 2 undergraduate students as interns. In particular, students will learn how to prepare reagents kits for biology /biotechnology teaching and execute quality control.

CRITERIA

- Major in Biochemistry
- Understand the concept of PCR and gel electrophoresis

CVs are accepted starting in March 2013. Interviews shall be conducted if overwhelming responses are received. At the end of internship, each student will be asked to submit an internship report.

All the tasks will be performed in the biochemistry student laboratory, Mong Man Wai Building 6/F, CUHK.
Duty hours for the intern are flexible (negotiable with our staff).

Financial Support may be provided.

If you need more information, please contact Prof. SK Kong at [<skkong@cuhk.edu.hk>](mailto:skkong@cuhk.edu.hk).

ABOUT US

New A Innovation is a dedicated player in the global biotechnology market with a vision of “*advancing life sciences & health care*”. We are committed to providing innovative and life-saving oxygen therapeutic products to fulfill the unmet medical needs in Eurpop, US and Asia-Pacific.

ABOUT THE INTERNSHIP PROGRAM

The Internship Program offers an opportunities to experience the job and working environment, plus the chance to work alongside with our expertise in our company.

DESCRIPTION

COMPANY

Lee's Pharmaceutical Holdings
Limited

www.leespharm.com

ABOUT US

Lee's Pharmaceutical Holdings Limited (Lee's Pharm or "the Group") is a public biopharmaceutical company with over 18 years operation in China's pharmaceutical industry. It is fully integrated with solid infrastructures in drug development, clinical development, regulatory, manufacturing, sales and marketing in China with global perspectives and currently markets eleven products in the PRC. Lee's Pharm focuses on several different areas such as cardiovascular and infectious diseases, dermatology, oncology, gynecology and others. It has more than 30 products under different development stages stemming from both internal R&D as well as from the recent acquisition of licensing and distribution rights from various US, European and Japanese companies. In 2010, Lee's Pharm ranked as Best Small-Cap Company in China (Rank 2nd) by Finance Asia. In September 2011, Lee's Pharm has been selected by Forbes as one of Asia's 200 Best Under A Billion Company (turnover less than US\$1 billion). The mission of Lee's Pharm is to become a successful biopharmaceutical group in Asia providing innovative products to fight diseases and improve health and quality of life.

Sigma Tau Group, the leading research-based international pharmaceutical company based in Rome (Italy), is a strategic shareholder of Lee's Pharm. Sigma Tau's ongoing R&D activities and commercial know-how are complementary to the existing business activities of Lee's Pharm and will result in creating significant business synergies for Lee's Pharm.

DESCRIPTION

We accept two undergraduate students as interns for 10-12 weeks. The development intern will gain broad exposure to research and laboratory operations such as conducting experiments and carrying out documentations of relevant records under the supervision of experienced scientists.

This internship provides current undergraduate students with the opportunity to develop laboratory and relevant documentation skills and experience with quality management systems. This position provides the opportunity to work with our experienced scientists for personal and professional growth.
